

VAIBHAV KUMAR

RESUME SUMMARY

Hi, I'm Vaibhav Kumar, a driven and detail-oriented cybersecurity enthusiast with a passion for data analysis. As a B. Tech student in Computer Science with a specialization in Cybersecurity and Forensic, I've developed a strong foundation in programming languages like Java, Python, and C++. With hands-on experience in tools like Nmap, Wireshark, and Burp Suite, I'm confident in my ability to identify and mitigate security threats.

SKILLS

- Management
- Accounting
- Marketing
- OWASP
- OWASP Security
- Penetration Testing
- Java
- C++
- Security Analysis
- Burp Suite
- NMAP

LANGUAGES KNOWN

English
Hindi

CERTIFICATIONS

- Fundamental Of Information Security
- Ethical Hacking Essentials
- Network Defense Essentials
- SQL Injection Attack
- C++

PERSONAL DETAILS

Current Location Dehradun
Date of Birth October 15, 2003
Male

EDUCATION

Graduation

Course B.Tech/B.E. (Computers)
College University of Petroleum & Energy Studies
Score 7.78%

Schooling

Class XII

Class X

Board Name	Other	Other
Medium	Hindi	Hindi
Year of Passing	2020	2018
Score	84%	86%

INTERNSHIPS

IBM | June 2024 - July 2024

- Analyzed security data to find trends and vulnerabilities and developed actionable insights to inform security strategies.
- ? Developed ability in security risk management, compliance, and reporting, with a focus on industry best practices and regulatory requirements.
- ? Collaborated with cross-functional teams to design and implement reporting dashboards using IBM's security tools and technologies

PROJECTS

security matric and reporting | June 2024 - July 2024

- Analyzed security data to find trends and vulnerabilities and developed actionable insights to inform security strategies. Developed ability in security risk management, compliance, and reporting, with a focus on industry best practices and regulatory requirements. Collaborated with cross-functional teams to design and implement reporting dashboards using IBM's security tools and technologies

Anomaly Detection Techniques using IDS | January 2024 - May 2024

- Intrusion Detection Systems (IDS) are indispensable components of network security, designed to detect and respond to unauthorized access and malicious activities. Methodologies such as packet inspection, statistical analysis, and machine learning algorithms to find potential threats. Instruction Detection Techniques:
 - ? System Call Analysis
 - ? API Call Monitoring
 - ? Opcode Analysis

Sorting Visualizer | September 2023 - December 2023

- Project was based on virtual representation of different sorting algorithm for better understanding of new learner of the data structure and algorithm.
It will be displaying the working mechanism of various sorting algorithms like, Bubble Sort, Selection Sort, Insertion Sort, Quick Sort, Heap Sort and Merge Sort

Network traffic analyser | June 2023 - September 2023

- A network traffic analyzer, also known as a network traffic sniffer or packet analyzer, is a software or hardware tool used to monitor and analyze the data flowing over a computer network. It is a crucial tool for network administrators, security professionals, and system analysts to understand and manage network traffic effectively.
