Career Objective

Seeking a Challenging Career opportunity in data Analysis or Cyber Security Analysis. Also, specify the type of role or industry you are targeting to make it more compelling.

Academic Details			
Year(s)	Qualification – Degree	Board/University	Percentage / CGPA
2021-2025	B. Tech in Computer Science Engineering- Specialization in cyber security and forensic	University of Petroleum and Energy Studies	7.78/10
2019-2020	XII	UK board	84 %
2017-2018	X	UK board	86 %
Subject Electives		Digital system and design, Digital marketing	
Technical Proficiency / Skills		language: - Java, Python, C++, Html tools: - Nmap, Wireshark, Burp suite Soft Skill: - Communication skill, Teamwork and collaboration, Time management and Leadership	

Summer Internship / Work Experience	
Srijan Social Internship worked as a math tutor in a remote village of my area and shared basic mathematics terms with children.	June 2022-july 2022
Work Experiment - IBM (Project intern) I played a key role in enhancing the organization's security posture by developing a comprehensive security matrix and reporting framework. I collaborated with cross-functional teams to find security risks, design mitigation strategies, and implement reporting dashboards using IBM's security tools and technologies. Through this project, I gained ability in security risk management, compliance, and reporting. Bullet point: - - Analyzed security data to find trends and vulnerabilities and developed actionable insights to inform security strategies. - Developed ability in security risk management, compliance, and reporting, with a focus on	June 2024-july2024

industry best practices and regulatory requirements.

- Collaborated with cross-functional teams to design and implement reporting dashboards using IBM's security tools and technologies

Projects (Major / Minor)

Project - Network traffic Analyzer

- Developed a real-time network traffic analyzer using Python and Scapy, capable of capturing and analyzing network packets to find trends and anomalies.
- Designed and implemented a graphical user interface using Matplotlib, providing an intuitive visualization of network traffic patterns and statistics.
- Implemented features such as packet filtering, protocol analysis, and traffic visualization, enabling users to gain insights into network behavior and performance.
- Integrated with Wireshark to use its packet capture capabilities and enhance the analyzer's functionality.
- Successfully found and classified several types of network traffic, including HTTP, FTP, and DNS, and detected potential security threats and anomalies.

Minor Project - Sorting visualizer

Bullet point: -

- Designed and developed an interactive sorting visualizer tool, using algorithms such as Bubble Sort, Selection Sort, and Merge Sort to educate users on sorting concepts.
- Implemented a user-friendly interface using HTML/CSS/JavaScript, allowing users to input custom data sets and visualize the sorting process in real-time.
- Improved the tool for performance, ensuring efficient rendering of complex data sets and smooth animation of the sorting process.
- Integrated features such as step-by-step animation, algorithm comparison, and data set randomization to enhance the learning experience.
- Deployed the tool on a cloud platform, ensuring scalability and accessibility for a wide range of users.

Minor project 2- Anomaly Detection techniques using Instruction detection techniques

- Intrusion Detection Systems (IDS) are indispensable components of network security, designed to detect and respond to unauthorized access and malicious activities. Methodologies such as packet inspection, statistical analysis, and machine learning algorithms to find potential threats. **Instruction Detection Techniques:**
 - **System Call Analysis**
 - **API Call Monitoring**
 - **Opcode Analysis**

Certification

- Ethical Hacking Essentials (EHE) from EC-Council
- Network Defense Essentials (NDE) from EC-Council
- fundamental of information security from Infosys
- introduction to cybersecurity tools and cyber-attacks from Coursera

ACHIEVEMENT

- I have taken part in Hack on Amazon - Season 4.
- I have taken part in the Focus on Code organized by the K. Ramakrishnan College of Engineering.
- I have taken part in Capture the Flag organized by RV College of Engineering.
- I have taken part in Anveshanam`24: Capture the Flag organized by Indian Institute of Technology (IIT), Jammu.
- I have taken part in Innovate and Inspire organized by the K. Ramakrishnan College of Engineering.
